Circle Chaser

Propellor

This brochure presents the most comprehensive range of light effect boxes available from any UK Supplier. Used individually or in combinations they enable D.J.'s and Groups to build up an immensely attractive stage display at relatively low cost.

Effects such as CUBE, SEGMENT, AND RAINBOW are basic in design but highly effective when used singly or in stacks. For example the RAINBOW Box will make-up into two quite different patterns as illustrated.

One of our earliest creations — the DECOR Boxes — have proved their popularity over the years and like the STARSCREENS are available in three standard sizes i.e. small and large Columns as well as Rectangular Screen.

At the other end of the scale we have the highly sophisticated MIRROR TUNNELS including the unique "DANCER" which gives the illusion of dancing figures moving down the tunnel.

The majority of the designs are intended to operate from three channel Controllers which again enables the overall cost to be kept to an absolute minimum. In the case of the KALEIDOSCOPE an internal switch is incorporated enabling both three or four channel operation with appropriately different patterns.

As a contrast we offer three models for operation with CHASER CONTROLLERS and these are our patterns SPIDER, CIRCLE AND PROPELLOR. In contrast to the three channel effects they give a sharper pattern change and the more sophisticated circuitry of Chaser Controllers provides a more extensive sequence of light patterns.

All FAL light boxes and controllers are fitted with standard multiway plugs and sockets to make interconnecting of effects a simple operation. In the event of lamp failure we can supply replacements immediately from stock should your local dealer not have these.

As new ideas will continue to be developed please be sure to consult your FAL Dealer when you are looking for a new addition to your display. At the same time we strongly recommend that you use compatible light controllers in the FAL range as this will give you the best in value and reliability.

SPECIFICATIONS

WEIGHT

DECOR BOXES

3-channel operation.	
SCREEN — 640 x 640 x 230 mm	15 kg
SMALL COL. — 790 x 230 x 212 mm (each half)	14 kg
LARGE COL. — 1410 x 230 x 212 mm (each half)	23 kg

STAR SCREENS

3-channel operation	
SCREEN — 623 x 623 x 200 mm	12 kg
SMALL COL. — 790 x 230 x 212 mm (each half)	14 kg
